Advisor: Dr. William Barge

INTRODUCTION

Cami & Tailor is a local clothing business in Angola, IN. They are starting a new line of clothes, but primarily focus on tailoring.

PURPOSE STATEMENT

The purpose of the Cami & Tailor database is to allow this small business to record information and orders more effectively. As well as provide them with a database that can continue to grow as the business does.
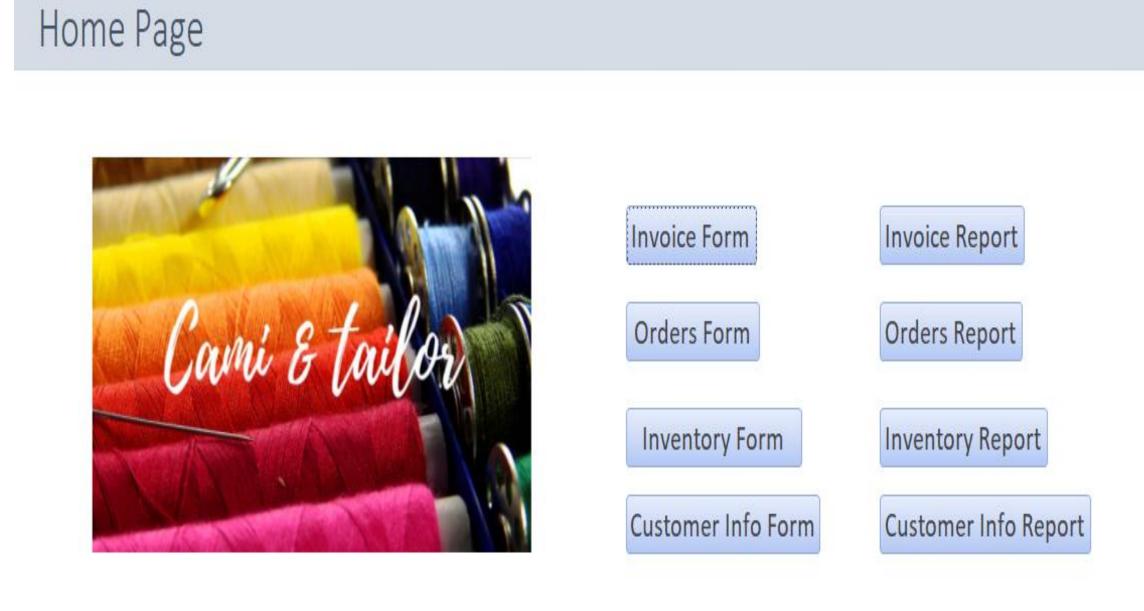

CUSTOMER NEEDS

-Database to record and track customer information, track inventory quantity & costs, track orders, print invoices

-Allow searching of previous orders and customers

-The website is to give the business a presence on the web

-Website to promote both sides of business Cami side which is the Art Side and Tailor side which is repair clothing part

LESSONS LEARNED

- Keep in constant contact with client
- make suggestions to help the client with decisions.

FINAL DESIGN

The final design is a fully functional database with easy navigation for the user.

FUTURE WORK

Answer any questions the client has, as well as expand the database and website as the business grows.

ACKNOWLEDGEMENTS

We want to thank Cami & Tailor for the opportunity to work on this project and their understanding as worked through problems.
