

International Pizza

Purpose: *To help students understand and become familiar with market economics and trade resources.*

How the Program Works:

- This project will be done in a 5th grade classroom
- We plan to use pizza ingredients in this activity
- Groups will be representing different countries of the world. (5 groups)
- Each of the countries will get a crust.
- Toppings will represent different countries
 - Sauce = Spain
 - Cheese = France
 - Pepperoni = Italy
 - Sausage = Germany
 - Vegetables = United States

- Students will trade among themselves to make a pizza with the toppings that their country desires
- After all the trading is done each country can “enjoy” their product
