

Trine University Annual High School Mathematics Competition Rules:

- Student registration cards must be filled in and team assignments must be completed prior to arrival.
- Each team consists of 4 students: 2 students competing at the elementary level and 2 students at the advanced level.
- Freshman, sophomore, junior, and senior high school students are eligible to compete.
- Placement as an elementary or advanced competitor should be based on the student's current academic ability.
- Competitors will work individually on Part 1 and will work as teams on Part 2.
- Competition scores will be 60% on individual scores (Part 1) and 40% on team scores (Part 2).
- Individuals who have placed first, second, or third at the elementary level in previous years must compete at the advanced level.
- Scholarship winners from previous years may compete at the advanced level, but will not be eligible for the scholarship prize.
- Exams will be written and graded by professors of Trine University.
- Knowledge of calculus will not be assumed.
- ***Scientific calculators may be used. No graphing calculators, laptop computers or wireless devices permitted in the testing rooms. Use of such devices in the competition room may result in a student and/or a team being disqualified.***
