TRINE
UNIVERSITY

**JANNEN SCHOOL OF ARTS & SCIENCES
FORTY-THIRD ANNUAL**

Math Competition

WEDNESDAY, JANUARY 31, 2018 *Rain Date: February 7, 2018*

THE TRINE UNIVERSITY MATH COMPETITION FEATURES:

Individual competition (advanced and elementary levels)—
problems included in a high school mathematics curriculum
AND
Team Project—the team works together on a problem and submits one solution.

The winner in the advanced level individual competition will receive a \$5,000.00 tuition scholarship to Trine University renewable up to 4 years (for a maximum value of \$20,000) subject to grade restrictions. Each of the four members of the winning team will be awarded a \$3,000.00 tuition scholarship to Trine University renewable up to 4 years (for a maximum value of \$12,000). A Math Competition Scholarship will be placed on top of a Trine merit scholarship, which is awarded upon admission to the University. However, the Math Competition Scholarship is viewed as a “stackable” award, and the University allows only two stackable awards above the merit scholarship. Students participating in multiple year competitions are limited to one Math Competition Scholarship (whichever award has higher value). Additionally, the value of the combined scholarships cannot exceed the cost of tuition.

Individuals may compete for the individual scholarship even if they are not part of a team.

Trine University will present awards to the teachers of the winning teams. The awards will consist of funds paid to the winning school system to be used for math education by the sponsoring teacher or math department. Awards will consist of \$1,000 for first place team, \$500 for second place team, and \$250 for third place team.

The registration letter will be sent the last week of November, 2017. Please note: There will be a \$10.00 per team registration fee. Individuals interested in participating without a team are \$2.50 each. If you have any questions you can contact:
