

STORM BUILDS A SNOW FRIEND

Brrr! It's a cool winter **sunset** at Trine University and Storm is **energetic**. He drank plenty of **rainwater** and already decorated his dorm for the holidays. Too bad all of his friends are busy studying for the final for their **Senior Design** class. Suddenly, Storm thought to himself, "I'll make a snow friend!"

First, Storm needed some materials. He needed **23** buttons for eyes, a **tiger claw** for the nose, **cargo shorts**, and **1738** sticks for arms. He rolled up 3 **pentagons** to make the snow friend's body. Next, he put the sticks on each side of the snow person.

He continued with the eyes and nose. "Uh oh! I forgot the mouth!" Storm exclaimed. To give the snow person a mouth, he traced a **surprised look** on the face. Once it was done, he decided to name the snow person **Little Stormy**.

After Storm finished, his friends came outside to find him. "Where were you? We looked all over **Best Hall 104** for you!" one of them asked. When they saw the snow person, they said, "Wow! That looks **elongated!**" They decided to make **3** more snow people to keep **Little Stormy** company.
